

**The 21st China (International) Small Motor Technology Exhibition
The 17th China (International) Magnetic Materials Technology Conference
& Exhibition**

Exhibition Date

November 9~11, 2016

Show Place

Shanghai Everbright Convention & Exhibition Center (88 Caobao Road, Shanghai, China)

Approver

The Ministry for Science & Technology of the People's Republic of China

Sponsors

China Electronics Technology Group Corporation
Small & Special Motors Committee under CEEA
Small & Special Motors Technology Section under SSEE
Micro-motors Quality Administration Center under the Ministry of Information Industry
CETC No.21 Research Institute

Undertaker

CETC No.21 Research Institute

Authorized Media

Introduction

2016 The 21st China (International) Small Motor Technology Exhibition

**2016 The 17th China (International) Magnetic Materials Technology Conference
& Exhibition**

China is a big country of manufacturing small motor in the world. In order to promote economy and trade, develop the small motor industry and strengthen the domestic and abroad exchange and cooperation, 2016 the 21st China (International) small motor technology exhibition and the 17th magnetic materials technology exhibition will be held in Shanghai Everbright Convention and Exhibition Center on 9~11 of November, 2016. The area of the exhibition will be up to 18,000 square meters and 800 standard booths will be built. We

welcome cordially domestic and abroad enterprises and specialists and scholars to Shanghai and attend the exhibition, seeking for opportunity of development together.

Exhibition Contents

Motor

- 1) Small motors: motors for robots, for aviation and spaceflight, for computer peripheries, for industrial automatization, for automobiles, for trams, for communication apparatus, for watching and hearing equipments, for automatization of handling official business, for household appliance, the cameras, for medical appliances, for machineries of the light industry, for ultrasound and toy using motors and general type motors etc.
- 2) Components and main materials for small motors: including reversers, bearings, rotary shafts, chassis, brush, shock flats, dies, pads, magnetic materials and insulants, etc.
- 3) Specific manufacturing devices and testing devices for small motors: the coil winding machines, the shock pressure machines, the magnetizing machines, dynamic balancing machine, Precision Measuring Instrument, the vibration noise environment tester, the bearing tester, the laser particle analyzer, the testing instruments and meters, etc.
- 4) Power supplies, electrical driving mechanisms and industrial automatization: frequency converter power supply, UPS power source, power pack for the switches, motion controlling systems and industrial automatization systems, etc.
- 5) Design soft wares and driving soft wares.
- 6) Motors for electric bicycle, massage armchair etc.

Magnetic Materials

- 1) Permanent magnetic materials.
- 2) Soft magnetic materials.
- 3) Devices of the magnetic materials.
- 4) Specific equipments of the magnetic materials and test analyzers.
- 5) Specific raw materials and auxiliary materials.
- 6) Application products of the magnetic materials.

The last exhibitions looking back

On 11~13 of November, 2015, more then 350 units of the domestic and abroad attended the China (International) Small Motor Technology Exhibition, more than 750 standard booths were set up and the show areas were up to 16,000 square meters. Parts of the corporations in the exhibitions were from Japan, South Korea, America, France, Germany, Italy, UK, Hong Kong (region) , Taiwan (region) , etc. More than 60,000 spectators were admitted during the

three days: including domestic visitors from 29 provinces (autonomous regions / jurisdiction cities) and more than 5000 overseas visitors from 25 countries and regions such as Japan, South Korea, America, France, Germany, Italy, UK. Many reports were made at the technology conference. The lectures were given by the famous specialists and professors from internal small motor circle and from Japan and Singapore. The new products and technology were issued by many corporations at the conference.

Forum theme: Innovation-driven, Intelligent manufacturing

- The development trend & the market foreground of the motor technology use for the robots
- The technology development about the high efficacious & saving energy of the motors in the future
- The technology development about the intelligence of the motors in the future
- Exploiting & manufacturing the new type micro-motors & the industrial development
- The development trend & the market foreground of the motor technology use for the electric vehicles (automobile, automatic vehicle and fitting machine)
- The new progress of the driving & controlling technology for the domestic & overseas micro-motors
- The smart progress in sets of the piece parts & materials for the domestic & oversea micro-motors
- The manufacturing technology & the smart making equipment of the micro-motors home & abroad
- The testing technology & the smart testing equipment for the micro-motor products home & abroad

Price List

Booth standard: 9 sq.m (3m×3m), consists of three walls (2.5m high), a lintel mark with the company name and booth number, one table, two chairs, two spotlights, 220v socket and carpet.

Particularly designed booth: designed according to the exhibitors' specific demand. Organizer of the exhibitions supplies only net areas. (1F's booths should be particularly designed)

About exhibitors: If you want to take part in the exhibition, please fill in the “**Application Form**”, deliver & mail or fax it to the exhibition undertaker after signed and stamped. Please pay the application fees **before September 30th 2016** to:
